Comhla LLC – ARTEMIS System
Performance Report April 2024

Strategy Description

The Artemis Program is a fully systematic swing trading system whereby system signals are predetermined by a computer and executed by the Advisor manually. The Artemis Program exclusively trades E-Mini S&P 500 futures, Micro E-Mini S&P 500 futures, E-Mini Nasdaq U.S. futures, and Micro E-Mini Nasdaq futures and is expected to carry trades overnight. The trading program is always in the market, long or short, in the E-Mini S&P 500 or the Micro E-Mini S&500 futures and long only at times in the E-Mini Nasdaq or Micro E-Mini Nasdaq futures contract. The Advisor will trade 4 Micro E-Mini S&P 500 futures contracts and 1 Micro E-Mini Nasdaq futures per $35,000. For each additional $7,000 in customer accounts this will trigger a change in position sizing. Once the sizing of the micro contracts gets to the point where there is an equivalent e-mini contract, The Advisor will reduce the micro contracts and hold one full e-mini in its place. Contract position sizing is calculated on a trade to close basis. Should the initial $35,000 have a losing trade resulting for example in losses of $7,000, then the Advisor will switch to trading 3 Micro EMini S&P 500 contracts and 1 Micro E-Mini Nasdaq futures contract. There will be a reduction to the previous teer for every loss of $7,000 in the account.

Minimum Investment	$35,000 USD
Notional Funding	None
AUM	$746,673
Management Fee	2.00%
Performance Fee	25.00%
Highwater Mark	Yes
RT per Million	3500
Margin to Equity	20.00%
Legal Structure	Managed Account
Investment Restrictions	None
